Says Marketing Act Economically Unsound

The Livestock Marketing Scheme, which originated in Saskatchewan and which has been mooted both in Alberta and Manitoba, is branded as "economically unsound and wrong in principle" by W. T. Hill, of W. T. Hill and Co., livestock dealers and feeders of Lethbridge, Alberta. According to the text of an interview published in The Lethbridge Herald, Mr. Hill was one of the men who attended the gathering of Livestock Men of the province at Calgary last week, when a scheme was adopted in outline which, it is understood, is to be submitted to a vote of the livestock producers of the province. Mr. Hill was most outspoken in his condemnation of the whole plan, and did not mince words in his talk to the press.

Mr. Hill, being a lifelong producer and for the past 15 years a feeder and dealer in livestock, is prepared, he says to support any revised plan of marketing livestock that is right in principle and economically sound in order that prices may be obtained sufficiently high to pay overhead and reasonable profit.

The Alberta scheme is almost identical to that of the Saskatchewan scheme. It is a deliberate attempt, he says to establish a 100 percent compulsory livestock pool, and will not doubt be managed by a few jobbers, would be dictators. It is an insinuation that livestock producers of Alberta, though they have been enough to produce their livestock, lack sufficient brains to market it. It is also an attempt to create a huge monopoly.

Mr. Hill believes that the majority of the farmers of Alberta possess sufficient pride and dignity to refuse to be enslaved by what he calls the compulsory scheme, thereby sacrificing their independence and liberties for collectivism and dictatorship. He urges them to place their stamp of disapproval on the scheme by registering vigorous protest with the Dominion marketing board, at Ottawa without delay, and offers his services free of charge in that connection.

"While," said Mr. Hill, "the scheme stresses its compulsory provisions and provides for the complete security for its managing (or, in all probability its mismanaging) dictators, it also provides for the complete elimination of the services of all independent livestock commission firms and thereby eliminates all chances for comparison of services rendered and returns obtained for livestock when sold, all competition having been eliminated. It falls hopelessly to indicate a single feature whereby more simplified marketing methods will be introduced and higher prices obtained for our livestock. Ample provision, however, is made to deprive the producer of his right, title and interest in his livestock once he delivers it to the marketing board (pool)."

According to the information tendered by the chairman of the meeting, it would appear all our livestock may be pledged to the bank as security against loans made to finance the purchase of feeder cattle, lambs or hogs for any producer whose application may be approved by the marketing dictators. I feel we are not prepared to consent or submit to such injustice. How many farmers want a mortgage placed on their livestock on which they have a clear title by any marketing organization."

"Let those who wish to market their livestock through voluntary pools do so, but the great majority of farmers in Alberta are not prepared to take any more chances on pooling their products after the past experience we have had with pools in the past. Losses have run into millions, and no wonder, for what does it concern a pool manager if his mismanagement results in losses when he has not one dollar invested in the business? For he still gets his salary just the same and cannot be dismissed until the expiration of his contract. Furthermore, the poor member who suffers by loss must just as be put to plan, for he is tied hand and foot under a merciless contract, and Dictator rests assured his victim cannot do otherwise than deliver his next crop of livestock to him whether he wishes to or not."

The only group who are clamoring for this scheme to be put into operation are those connected with the distributing interests who find that their claim of services are not attracting credit to their mill. They are losing out very badly and see in this scheme their only hope for retention of their jobs and the possibility of receiving much more favorable remuneration. It is certainly not the producers' interest who are thinking of."

"I was quite impressed and au-

Canada Makes Progress Says Beatty

C.P.R. President Reviews Past Year and Finds Evidence of Permanent Economic Improvement in Advances so far made—Predicts Canadian Wheat as Best in the World will find Steady Market.

THE course of our recovery from the economic catastrophe which swept over the world in 1929 and 1930 has been markedly different from that of any of the previous cases of business depression in this country. This time we seem to be experiencing a process of slow rebuilding, and, as far as I can see, one of permanent re-adjustment of our economic activities to conditions which have radically and permanently changed. What we are today experiencing is a process of steady, and I hope permanent growth.

This to my mind represents a normal result of the causes which led to the great collapse of Canadian business. The boom conditions, which were followed by a temporary depression after the Armistice were, as far as Canada is concerned, chiefly the result of forces and conditions in other countries. Actually our productive boom resulted from tangible demand for Canadian products, and from conditions in other countries which directed a flow of capital into Canadian development. Equally the economic collapse in Canada resulted chiefly from forces operating in other countries.

Nothing is more important in our economic life than our great exporting industries. In the case of wheat I have never accepted the pessimistic view which has been freely expressed. The world surplus stocks, produced partly by active encouragement of production in many important countries, and partly by a series of unusually favorable seasons in Europe, seem to be needed to meet the marked shrinkage in production in 1934. While complete recovery of world wheat in wheat must depend on some limitation of excessive economic expansion, on the other hand, monetary exchange, and on increase in the total volume of world trade, will not find a steady market.

Other primary products, such as minerals, lumber, and bacon are being exported in increased volume and at better prices, largely owing to the imperial trade agreements of 1932, and the new primary industry shows clear sign of recovery.

It is to be recalled that the past few years have seen a further increase in the cost of the Dominion. The provinces and territories are being export in increased volume and at better prices, largely owing to the imperial trade agreements of 1932, and the new primary industry shows clear sign of recovery.

January 6, The Epiphany of Our Lord 10:00 a.m. Sunday School 11:00 a.m. Morning Prayer and Sermon. 7:30 p.m. Evening Prayer and Sermon. Mrs. L. D. Wright will be the Organist both morning and evening.

direction of governmental participation in business. Regrettable as is the loss occasioned by errors on the part of private enterprise, this type of loss is corrected by reduction in the income and capital holdings of those who finance the enterprises. An unwise investment by a public body means a permanent charge on the tax-payers. I recommend this thought to those who believe that further expansion of governmental activities is the best method of protecting the ordinary citizen from exploitation by capitalists. In actual fact the safest policy for great capitalists is at present to buy securities issued by public bodies and to leave the chance of loss to be carried by the taxpayer.

Throughout the past year the matter of the country's railway problem has received an increasing amount of public attention, and I am convinced that proposals for its solution along the lines of national management for the two great companies have made decided progress. In all directions there is a steady willingness on the part of the public to enter upon an unprejudiced consideration of the case, and even among those classes whose interests might at first glance seem to be threatened by any such proposals, I discover a growing desire to examine their possibilities and to find out if they really are as dangerous as those who early rushed into protest to attack them and to find out if they really are as dangerous as those who early rushed into protest to attack them.

But the criticism should be fair and honest and it should be based upon a fairly sound understanding of the railway economies and not upon personal animosity or prejudice. I am not writing here to defend the railway but to state the truth when I affirm that most of the criticism that has come out so far will not stand up under the most searching criticism, and that the railway should not be forced to make a step to the right or left without first having been subjected to a thorough and impartial examination.

It appears to me that we can look back on 1934 with some contentment, as a year during which we found that the world was not ending, and that by industry and thrift nations and individuals could still prosper. What interests me more is that I believe we can look forward to 1935 with confidence that the faith in her future which too many of us seemed to crumble and that we shall again come to realize that all that is wanted to set this country on a forward path of progress are such simple virtues as energy, honesty, and ordinary common sense.

Coach Dorsey is working the boys out every night and the team shows good effects from his training. A real fast game is promised. The ice should be in perfect shape with the present cold weather. Fans! you should not miss this game—it will be fast.

DOGS KILL PIGS

Nels Pearson reports that stray dogs created havoc in his pig yard one night this week, four animals having been killed or so worried that they had to be slaughtered. One black dog and one police dog are thought to be the guilty animals, but the owners have not been located. It might be well for dog owners to keep their dogs tied up at night, as trouble may be averted.

STETTLER HERE ON SATURDAY

Hockey fans will see a real game on Saturday night at the local arena. The eleven body types are all expected to be here to battle the locals in a Central Alberta League fixture. The local team is going good now and should win this game. Their game with Red Deer last week which ended in a draw, gave the home boys plenty of encouragement, as the Red Deer lineup is plenty fast.

which in turn have been used as the right of way for a great number of freight vehicles. To a great extent the operations of these vehicles and their policy in setting their charges, have not been subjected to the same close supervision which public authorities have long given to railway operations and tariffs. In this case also public opinion is pressing for better handling of the situation. The railways do not question the advisability of building good roads, or of permitting them to be used for commercial transportation, but the perfection of the present attempt to proper control of this operation will, in my opinion, return to the railways at least some of the business which has been lost to them by highway transport and place both highway and rail transportation on a more equal footing.

It is also interesting to note a growing public sentiment in the direction of demanding some control of the railways in the case of their great and costly inland waterway system from those who use them—especially in the case of ships of foreign registry.

With every correction of these special cases of unfair competition, the Company must depend chiefly for a restoration of its normal business on the demand for Canadian property in general. The outlook in that respect is comforting. The very careful studies prepared by the Dominion Bureau of Statistics indicate a condition far from alarming as some authorities would make it.

In this great and scantily populated country we should not, however, be talking only of recovery. Canada should look forward to expansion in every direction. To my mind the policies needed to insure this are very simple. I should list them as: scrupulous care to prevent the debts of public bodies and resulting destructive taxation from any further increase; concentration of our efforts both in public policy and private business on the increase both in volume and prosperity of our primary industries—especially agriculture; public and private business policies directed to increase the population of Canada—especially in the agricultural areas; and a steady and repeated insistence, an immediate rectification of the burdensome and costly duplication of transportation facilities.

It appears to me that we can look back on 1934 with some contentment, as a year during which we found that the world was not ending, and that by industry and thrift nations and individuals could still prosper. What interests me more is that I believe we can look forward to 1935 with confidence that the faith in her future which too many of us seemed to crumble and that we shall again come to realize that all that is wanted to set this country on a forward path of progress are such simple virtues as energy, honesty, and ordinary common sense.

Rimbey Man's Spruceville U. F. A. is Active

There will be an evening meeting of the U.F.A. and U.F.W.A. on Tuesday, January 8th for the purpose of discussing the resolution before the delegates go to the convention in Calgary.

There will be a public meeting in Spruceville Hall on Thursday afternoon, January 10th, when Mr. J. McCrae-Newman of Saskatoon will give an address on Economic Chaos, and the way out of it. The meeting opens at 2 p.m.

The Junior U.F.A. are having their meeting at the home of Miss Vena Kasha, on Wednesday night, Jan. 9th. Mr. William Runtz, of Wetaskiwin, Junior Director U.F.A., will speak at the meeting. A good attendance of members is requested. The seniors are cordially invited to be present at the meeting.

Mr. and Mrs. Roy Rice entertained on Friday being the occasion of their twenty-third wedding anniversary. Congratulations.

Mrs. W. W. Burton had the misfortune to fall down the stairs on Sunday, 23rd, dislocating her shoulder. We are glad to say she is improving and has been the guest of her daughter Mrs. N. Hall for a few days.

There will be a dance in the hall on Friday, January 11th. Wright's orchestra.

Mrs. Sandy Swanson had her sister and niece, Mrs. E. F. and Dorothy of Otokos visiting her during the holidays.

A number in the district have been laid up with colds during this cold weather.

The Novelty Dance on the 28th at Spruceville was a real success as far as fun and mirth went despite the cold night.

Fire Breaks Out In Local Bank

Fire of unknown origin broke out at the Bank of Montreal building here, on Sunday night last at about 11:30. A member of the bank staff was awakened by smoke in his room and immediately sent in the alarm. The fire broke was quickly on the scene and the blaze burned under control speedily. The fire was located between the floors of the building and it was remarkably good work on the part of Chief Siga and his fire ladders that the fire was located so quickly. Considerable damage was done by water and smoke.

Juveniles are Shaping Up

On December 14th the junior organization was called and over 30 boys turned out to face the coach Dorsey. Five teams were on the ice that night and from these four were selected and numbered 1, 2, 3 and 4. In the series of four games each team 2 and team 4 each scored 7 goals in three games; No. 1 scored three and No. 3 scored 2. Irvin Calkins, Lloyd Frizzell, Irvin Todd and Tom Carruthers have acted as goal keepers. Roberts and Landon each have 4 goals to their credit. Mast 3, Perkins and McFadden 2, G. Danner, Carter and Ted Carruthers 1 each.

ALL REVOLVERS AND SIDE ARMS MUST BE REGISTERED AT ONCE

All revolvers, automatic pistols or other side-arms must be registered at once. All registrations must be made in person to the R.C.M.P. Registering by mail is not sufficient. When registering these guns, applicants must bring in serial number, calibre and full description of said weapon. A person having a permit to carry a revolver or other side-arm must also register gun. Registration must be made immediately.

JULIUS KASSEL DIED OF GALLBLAD MONDAY

Julius Kassel 39, died on the scaffold at Fort Saskatchewan soon after 2:00 a.m. Monday for the slaying of Julius Molnar at the latter's farm west of Wetaskiwin in June. Kassel went to his death quickly.

LINDBERGH KIDNAPER ON TRIAL THIS WEEK

Bruno Hauptmann, alleged kidnapper and killer of the Lindbergh baby, goes on trial for his life this week at Flemington, N.J. The jury that will try Hauptmann for the brutal slaying of the baby was selected today at 10:30.

COLD WEATHER

Bear Lake was the coldest place in Canada over the holiday season. 73 degrees below zero was registered, which is the coldest registered in Canada in 23 years. The lowest temperature previously registered in Canada was at Mayo, Yukon territory on Dec. 20, 1933, when the thermometer went down to 66 below, to beat the temperature registered at Fort Vermilion on January 11, 1911, of 67 below.

Friday, January 4th.—The Annual Meeting of Parsonage will be held in the Oddfellows' Hall at 8 p.m. This is your meeting and its success depends upon your being present. Social hour afterwards. Will ladies please bring sandwiches or cake, or both?

January 6, The Epiphany of Our Lord 10:00 a.m. Sunday School 11:00 a.m. Morning Prayer and Sermon. 7:30 p.m. Evening Prayer and Sermon.

Mrs. L. D. Wright will be the Organist both morning and evening.

Myrnam Man Murdered

Myrnam, Dec. 31.—Alex Smoliak, 38-year-old farmer, was slain last night as he played cards with his family in his farm home. Three men from Myrnam, the killer crept close to a window and fired through the glass at him.

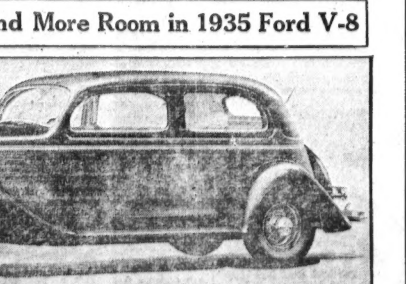

Police Monday are holding John Krul, 38, hired man at the farm, but have laid no charge against him. He has been under surveillance since midnight Saturday when police were told he had not been in the house and when he was unable to prove he had been in Myrnam at the moment Mr. Smoliak was slain.

Mrs. Annie Smoliak, about 30 years old said her husband was shot at about 7:00 p.m., but it was almost 11:00 p.m. before police were notified at Vegreville and after midnight when they arrived. In the meantime, half an inch of snow had fallen and footprints were indistinct.

REYNOLDS' HUSBAND

The marriage of Mr. E. L. Reynolds, well known cattleman and farmer of the Olive district, and Miss Lillian E. Husband, took place in Wetaskiwin on December 21st, and the young couple are receiving the felicitations of their many friends in Central Alberta. The groom has resided in this district for many years, and the bride has taught school in a number of Alberta towns, and is a graduate of Alberta University. They will make their home at the Olive.

New Body Lines and More Room in 1935 Ford V-8

The Heart Of Man

The season is at hand when once again the age-old song recorded in Holy Writ "Peace on earth, goodwill toward men" will be sung by millions of voices and the sentiment expressed in the words will be made the theme of countless sermons, addresses, and written articles—of which this is one. And the question will be asked by a perplexed people, asked in their bewilderment and sorrow, why is it that after the passage of nearly 2,600 years, instead of peace on earth and goodwill among and toward men, the world is filled with rumors of and preparation for war, and suspicions and hatreds are rife among people everywhere?

In seeking an answer to this question innumerable replies and reasons will be given. Many will lay the chief responsibility upon politicians; others will blame the inhumanity and selfishness of the makers of armaments; a goodly number will declare it is the existing economic system that is the root of the trouble; in a word, the tendency will be, as it has been throughout the years of the past, to apportion the blame to others and to institutions of our own making, but never to accept any share of it as our own responsibility. Yet, in the final analysis, the responsibility lies at our own door and rests with us as individuals.

A nation is not an organization of individuals, and the national viewpoint is not the aggregate of the viewpoints of the people who constitute the nation; the national spirit is the spirit of the people themselves. Politicians do what the people want them to do, and statesmen are forced to act, frequently against their own better judgment, because their people insist upon certain action and will accept and support nothing else.

Nations to-day remain in a warlike mood because the individuals who constitute the nations are themselves lacking in goodwill—the one toward the other, and lacking goodwill—which is the only source of peace—there can be no peace.

Individuals clamor for security in their homes and occupations; nations as organizations of individuals demand security; but there can be no security either for the nation or the individual unless there be peace at home and abroad. Nevertheless, as individuals, in our own local communities, and in our relationships to each other, mankind is unanimous in these great truths, and to a great extent maintains attitudes of suspicion and hostility instead of seeking for understanding and goodwill.

The world, and each and every community throughout the world, counts its men and women who, in the current language of the day, are chiselers, seeking to better themselves at the expense of others, trying to pull others down in order that they may rise, desirous of taking that which others have in order that they may possess it. Many creditors are harsh, unsympathetic, and unyielding in their attitude towards debtors in great difficulty through no fault of their own and insist on their pound of flesh even though it means the ruin and destruction of the debtor; on the other hand, many debtors dishonestly seek to take full advantage of a difficult situation to cheat and defraud those whom they had asked to assist them in the past and who did assist them. And demagogues, both of the Right and the Left, of both high and low degree, take full advantage of each difficulty to fan the flames of discord and arouse and intensify feelings of enmity and prevent reasonable co-operation and the development of goodwill leading to peace and mutually beneficial compromise agreements.

The result is that all parties are invoking the power of the law to enforce their demands. As individuals they demand that force be applied as they would have it applied. The next step, of course, is that as national groups they demand that the same law of force be applied against other national groups. And that means preparation for applying such force, and war as the only alternative.

The answer to the question propounded above is that the heart of man is wrong. Mankind has not yet risen high enough, nor educated itself to the point where peace on earth and goodwill among men is really and truly desired. Mankind still prefers to live and rule by force, still prefers to act on the theory—it is not a principle—that might is right. Once man as an individual changes his viewpoint he will find politicians both ready and anxious to accept and act upon it; the armament makers will find themselves without an occupation; freed of all the restrictions and obstructions imposed by individual and corporate selfishness and the evils of narrow nationalism, the economic system will operate successfully.

The bringing of peace on earth and goodwill toward men is not a matter of law; it cannot be brought about by force; it must come, because it is the only way it can come, through change in the hearts of men. It will be a slow growth, a development to which every true lover of peace and every believer in the power of goodwill is called upon to lend his or her example and influence. Railing at others will achieve little; peace must be lived and goodwill practised.

The Book of Remembrance

The gigantic task of gathering the names of the 68,000 Canadians who lost their lives in the World War, has been started at Ottawa. The names are being inscribed in a Book of Remembrance, when completed, will be placed on the altar of the Memorial Chamber.

Infants' Colds

Young children easily catch cold. So Mrs. Russell Ward, of Hillton, Ont., writes: "I have a little boy, and I find that there is a great help in giving him a few of these tablets. Thousands of mothers do the same not only for colds but for teething, indigestion, constipation, fretfulness, irritability, colic, and all sorts of ailments. The tablets are safe and sure in relief of childhood's common ailments. Price 5c."

Busy Bank Days in Canada

Volume Of Cheques Cashed Shows Increased Business Activity

Busy days are here again for Canadian bankers, and if the volume of cheques cashed by the banks may be used as an indication of business conditions, then prosperity's corner has been located. The amount of cheques cashed against individual accounts by the branch banks in the thirty-two clearing centres of Canada moved up in October to a relatively higher point than in the same month of any other year since 1930. Bank debits were \$2,409,000,000 and compared with—\$2,823,400,000 in October 1933 show a gain of 20.8 per cent., which represents a considerably higher level of business and financial activity. October's gain over September, after seasonal adjustment, was 7.3 per cent. During the first ten months of 1934, the cumulative total bank debits was 8.4 per cent. greater than in same period of last year, the amount being \$20,734,000,000 compared with \$24,052,000,000 in the first ten months of 1933.

All but four of the thirty-two clearing centres reported increased business during October. Gains were shown in Saint John and Moncton, the total for the Maritime Provinces being up 7.8 per cent. Montreal and Quebec City showed increases over October of last year, the gain in Montreal amounted to 23.7 per cent. The net result for the province of Quebec was a gain of 24.7 per cent. With one exception gains were general among the thirteen centres in Ontario. The total in Toronto was up 9.5 per cent., while the province showed an increase of 18.6 per cent. The prairie provinces recorded gains in nine out of ten centres, and a gain of 26.8 per cent. was shown for the three provinces. The increase in Winnipeg was 29 per cent. All three principal centres of British Columbia showed gains, the total for the province being up 15 per cent.

Gasoline From Lignite

University Of Minnesota Scientists Are Carrying On Experiments

Two University of Minnesota scientists, successful already in developing cellulose, a principal ingredient of rayon, from the aspen tree, speculated on the possibility of making gasoline from lignite.

The two, Professor Lloyd H. Ryerson and Ralph E. Brewer, hunting new materials and new uses for old ones with the co-operation of the Northwest Research foundation, were heartened by the success of German scientists in making gasoline from brown coal. Lignite, they pointed out, is a similar composition to Germany's brown coal.

Success of experiments in making gasoline from lignite would create an outlet for vast deposits of the low grade coal which underlies prairies of North and South Dakota and eastern Montana. Geologists have estimated their total at 1,000,000,000 tons.

Saskatchewan Butter Output

Production For First Ten Months Of 1934 Shows Increase

Creamery butter production in Saskatchewan during the first ten months of the present year is over one and a half million pounds, or 8.5 per cent., in excess of the make during the corresponding period of last year. From January 1 to October 31 the output amounted to 19,535,138 pounds and was 216,000 pounds more than the total production during 1933. Saskatchewan's production of creamery butter during October amounted to 1,229,447 pounds, which represented an increase of 26,357 pounds over the make in October of last year.

Most of the fruit shipped to Canada from St. Lucia, British West Indies, is packed at the depot for private exporters in the government packing shed. The shed is also used regularly by other exporters for packing fruit under government inspection.

The loftiest mountain in North America, now called Mt. McKinley, was known to the Indians as Denali, "Home of the Sun."

Stoke-on-Trent is England's foggiest spot, having had 129 foggy days, smoke haze in the period between October, 1932, and March, 1933.

Eat, talk, sing and shout and never fear dislodgment. Your false teeth stick all day long when you sprinkle on Dr. Wepert's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they know it's the best! Costs but little—say druggists.

Canadian Reindeer

Drive Nears End

After A Five-Year Trek Great Drive Nearing Final Stages
Canada's Christmas present to her Eskimo population this year will be a herd of about 3,000 reindeer.

After a five-year trek of 1,600 miles across the rim of the Arctic Circle from Western Alaska to the Mackenzie River delta, the great drive of reindeer is now in its final stages, and it is expected that delivery by the vendors of the herd will be successfully completed before the beginning of the New Year. Starting the arduous journey in December, 1929, the herd reached Canadian soil in the spring of 1933, and plans were made to rest the animals during the summer and early fall in preparation for the 70-mile drive across the delta of the Mackenzie to the station prepared for them near Kitigazuit. In January, 1934, the crossing was attempted, but owing to severe weather conditions the herd stampeded during a blizzard and returned to their grazing ground near Stagg Point. Quite a number of the herd were lost, but this has been more than made up by the successful fawning season this year. The herd is now ready for another attempt to cross the mouth of the Mackenzie and with the benefit of the experience gained in the previous effort it is felt that delivery to the station near Kitigazuit will be accomplished.

The five-year trek across the roof of the world marks up an Arctic saga destined to live long in the lore of the north country. Before civilization's invasion of the north country the Eskimo was content to lead a simple and hardy life, depending upon the game animals and fish for a living. The coming of the white man changed this and the Eskimo, in order to obtain rifles, ammunition, and other things that he did not need before, must now devote his time to hunting the white fox, which is the principal fur of the Far North of commercial value. As he has to leave his hunting during the time when he should be catching seals and hunting caribou for food and clothing, the Eskimo must now go to the trader for these necessities. With the object of broadening the basis of subsistence of the northern natives, the introduction of the reindeer has been brought about.

Britain's Noiseless Bomber

Aircraft To Have New Type Of Engine Silencer

Night bombing aircraft of the British Royal Air Force will in future be silent messengers of death and destruction.

These giant birds of prey when in flight, are to be fitted with an added menace—a new type of engine silencer so efficient that when flying above a height of 10,000 feet the aeroplanes will be inaudible from the ground.

All previous silencing devices for aero-engines have had two great disadvantages. They have been too heavy and have had an adverse effect upon the engine's power by setting up powerful back-pressure.

The new silencer is relatively light and its use involves only a small loss, not exceeding 2 per cent., of the engine's power output. This was shown in the course of recent tests at Haworth airbase, where three different types of aircraft were fitted with the silencer.

Its adoption will add greatly to the difficulties of ground defences relying upon "sound-locators" for the detection of enemy raiders at night.

Always Had Perfect Alibi

Twins Working In London Club Tangled Up Service

A tangle of twins at the Embassy Club, Old Bond St., London, after a fortnight at this west-end club has been unravelled by the separation of Morris and Raymond Browning, identical twins from Dulwich, engaged as page boys. For two weeks the boys were on duty together and the result was somewhat topsy-turvy for all concerned.

"Why haven't you done this?" the headwaiter would ask. "You didn't ask me; you asked the other one," was the invariable retort of which ever twin he addressed. So now when one twin comes on duty, the other goes off.

The winter mortality of the rather threatening number of chin chugs in south-western Ontario this past season is under observation of officers of the Entomological Branch of the Dominion Department of Agriculture against a possible serious outbreak in 1935.

Pensions for the blind have been provided by Swedish law, the amount being about \$129 a year.

Approximately 300 women hold flying certificates in Great Britain.

(Editor's Note: This series of articles is attracting wide interest, and many readers have written in to the author, asking for a personal analysis of their own writing. The author again invites readers to consult him, and you will find details of his offer in the following article.)

Miss S. writes: "I am 18 years of age, and in love with a man of 39. My parents do not like me having anything to do with him, and yet he wants to marry me. What would you advise?"

I believe you would be doing a very unwise thing if you marry him, Miss S. His writing tells me that he is very art in his ways, is used to having his own way, and dominates over others. And he is selfish to the core.

You, on the other hand, have a variable nature. Sometimes you are cautious, whilst at other times you are apt to be impulsive. There is a good deal of idealism in your nature. You find it difficult to make up your mind definitely on any point.

You are young and some of your best years lie ahead of you. Do not make a hasty, false step at this stage of your life.

On former principles, I am opposed to a young girl of your age marrying a man so much older, and I am afraid of the result. Such marriages have gone on the rocks. Of course, there are cases where happiness prevails, but they are rare.

The odds are against happiness in marriages between April and September, to write graphically. A man of 39 is, more or less, mature in his views and outlook, while a girl of 18 is, in most respects, on the threshold of life. And imagine, when you are but 30, your husband would be over 50.

"School-teacher," writes: "I am dissatisfied with the life of a country school-teacher. I get terribly out of patience with it, and dread the thought of continuing the work for years to come. I have a proposal of marriage from a young farmer. He is very well off, and his wife has been something of a struggle. I like him quite a lot, and am wondering if marriage to him would be a great relief to my present discontent. Should I accept his proposal?"

I sympathize with your position, Miss School-teacher, but am afraid you may only be jumping from the frying pan into the fire. You are of a restless nature, even on the move, and routine or the humdrum is very irksome to you.

You do not say that you love your young farmer friend. If you did, I might be tempted to say "go ahead" for he has a likable nature, is sincere and sincere and anxious to make a success of his work.

L. E. Lorriville, have arrived at Bait, the capital of Hunza, in North India, on one of the most romantic quests in the world. They hope in the course of a year's stop in the district to solve the mystery of the Burushah language, which is spoken by an aviator, some believe to be descended from Alexander the Great. The Burushah, who number about 20,000, are a clan of apparently Persian or Afghan origin. They live on both sides of the Hunza River, which divides the State of Hunza from that of Nagar, in a region of wild and almost inaccessible mountains. For generations they were the terror of the trading caravans between Chinese Turkestan and Kashmir.

Gift From Canadian Greeks

Buffalo Of Manitoba Bronze Sent To Royal Couple

A life-like buffalo, of Manitoba bronze, mounted on a base of Manitoba marble, was sent to London, the wedding gift of Greek residents of Manitoba to Princess Marina and Prince George.

The buffalo and base is about two feet long and two feet in height. A Greek design encircles the base, on which is mounted the Manitoba coat of arms.

On a gold plaque is inscribed "To Princess Marina and Prince George from the Hellenes of Manitoba, Canada."

Cash For Beet Growers

Harvest This Year Totals Close To Million Dollars

Another quarter of a million dollars in cheques has been received by beet growers of Southern Alberta. The new payment will make a total of \$610,000 paid out on the initial base rate of \$5 per ton, with a final payment to be made at the completion of the delivery season.

With a record crop of 170,040 tons, the beet growers will receive close to \$1,000,000 for their harvest this year.

At October 31, 1934, forty-three per cent. of the land in Canada intended for the 1935 crop was estimated to have been ploughed, as compared with forty-one per cent. in 1933.

Granulated sugar sifted over the top of a sponge cake before putting it into the oven gives it a rich brown crust when baked.

Fewer, Less Severe Colds With Colds-Control Plan

New Aid In Preventing Colds Makes Possible Better Control Of Colds In The Home

CLINICS PROVE PLAN

Mothers can now help their families to greater freedom from colds—fewer colds, shorter colds, milder colds—thanks to the development of the new Vicks Plan for Better Control of Colds. The Plan has been clinically tested by physicians—and its effectiveness is being proved daily in thousands of homes.

The Plan, perfected by the makers of Vicks VapoRub, is introduced along with the new aid in preventing colds, Vicks Va-tro-nol (for nose and throat). This new Vicks preparation is the ideal companion to VapoRub, the modern method of treating colds. Briefly, the Plan is this:

To Help Prevent Colds. Watch yourself and children after exposure to any condition that you know is apt to be followed by a cold, such as:

Contact with others having fresh colds. Throat and chest with Vicks VapoRub. Public places—mildly chilled rooms, public places—mildly chilled rooms, temperature—excesses in living, such as over-eating, smoking or drinking, which reduce body resistance. Then—at the slightest irritation of

New Kind Of Concrete

Discovered When Workman Fried Meat On Waste Site

A workman in a slate quarry in North Wales found himself without a frying pan when he wanted to cook his ham-and-egg dinner.

So he used a piece of waste slate instead. Then he left it on the fire and forgot it.

As a result, a new kind of economical lightweight concrete has been discovered.

The piece of slate expanded in the heat. When it is broken up it can be used with cement to make a light form of concrete, such as is used in partitions and house walls.

"Its moisture expansion is much lower than that of the usual materials," an official of the department of building research said.

"It is easily nailed, and is an excellent key for plaster work."

Seeking Mystery Tribe British Couple Start On Romantic Quest In India

A British couple, Mr. and Mrs. D. L. E. Lorriville, have arrived at Bait, the capital of Hunza, in North India, on one of the most romantic quests in the world. They hope in the course of a year's stop in the district to solve the mystery of the Burushah language, which is spoken by an aviator, some believe to be descended from Alexander the Great. The Burushah, who number about 20,000, are a clan of apparently Persian or Afghan origin. They live on both sides of the Hunza River, which divides the State of Hunza from that of Nagar, in a region of wild and almost inaccessible mountains. For generations they were the terror of the trading caravans between Chinese Turkestan and Kashmir.

Prince Has Seven Names

The Prince of Wales bears seven baptismal names: Edward Albert Christian, after his grandfather, King Edward VII, and two great-grandfathers, the Prince Consort and King Christian of Denmark; George Andrew Patrick David, in honor of the patron saints of England, Scotland, Ireland and Wales.

The first country to issue paper money was China.

It isn't necessary to put up with cooking odors all through the house when you bake or boil fish. Wrap the fish in Canapar Cookery Parchment.

ment. Not only will the odors stay in—but the fish will have a more richly delicious, with its full natural flavor retained.

Makes Vegetables More Delicious, Too

Instead of allowing much of the goodness and flavor of vegetables to escape in steam, cook them in Canapar. With Canapar you can cook several vegetables in a single pot. The flavour simply can't escape. Line meat pans with Canapar, too, to prevent fat burning. Canapar improves flavour and food value—saves fuel—and eliminates pot scraping and scouring.

Good Work Of Scientists On Behalf Of Our Agriculturists Will Save Millions Of Dollars

The gambling element in farming, the destruction of crops through insects and adverse weather, those natural forces that in the past have broken the hearts and bankrupted millions of individual farmers and caused economic disruptions in nations, will be lessened in the future and eventually largely controlled if the work of the entomologist reaches the extent now forecast.

This picture was drawn in the Dominion-wide conference of entomologists held in Ottawa.

The economic side of the work of the insect men, expressed in the co-operation of the Dominion and provincial governments, was demonstrated in the announcement that \$100,000,000 was saved in Canada last year in lessened damage to plant life, crops and other products.

Of this amount \$50,000,000 was saved in combating ravages of grasshoppers on the prairies, although these pests took a terrific toll from the wheat farmers.

The grasshoppers pest was prominently before the conference but it was stressed that this is only one of the many pests taking economic toll in destroying crops. Cut worms, wire worms, and 3,000 other destructive insects were directly before the conference and were named as constituting a distinct menace, with almost incredible destructive power. In Canada over 30,000 insects have been classified by the entomologists.

Following the conference an announcement on the findings on grasshoppers alone will be released by the department of agriculture.

How the weather man and the agriculture experts, entomologists and others, are co-operating with the various governments to take the gamble out of farming, was told the conference by J. Patterson, Toronto, director of the Dominion meteorological bureau.

How the government breeds parasites and releases them to combat the commercially dangerous insects was described by A. E. Baine, Belleville, Ontario. Insects harmless to themselves are bred in millions, taken to the areas infested and proceed to destroy their natural enemies.

Wear Formal Attire

New York. Bookmakers Work In Evening Clothes And Toppers

D. W. Klein, who took the "While You Wait" idea many years ago and ran it into a chain of shoe repair shops and a fortune, surveyed the four shoe boys in his shop at 11 Park Row, New York, last night.

"It looks so good I'm going to do it in the other thirty-three shops."

What looks so good to Mr. Klein is the formal evening attire he introduced to replace the colored smocks formerly worn by his shoe boys.

There are four young colored shoe boys in the Park Row shop. They started out wearing full evening dress, including a silk topper.

The next day they complained so about the wing collars hating their necks that Mr. Klein and the shop manager, George Frank, allowed them to substitute the standard starched collar for the "wings."

The white bows were dirty soon, too, and the boys show up now in black bow ties.

Although they are more comfortable, the shoe boys were not particularly enthusiastic about their new outfits. One, named Walter, said:

"It don't make no difference to me, only this silk hat—I can't shine so good with it. It's hard to keep it on straight while you are taking ticks at shoes. And if you press it down tight, it makes your head ache."

The first night of the shoe boys in tails and toppers is surprising enough to the customer, but it is nothing compared to the customer's surprise when he peeks down from the shine stand and sees his reflection in the crown of the silk topper.

A Costly Oyster Stew
Mrs. Ted Brooks of Modesto, Calif., cooked a \$6,000 oyster stew recently and declares she has permanently lost her desire for cooking oysters, reports the Associated Press. In a can of the seafood that went into the stew was a perfect pearl—but the pearl had been scorched and was declared worthless by the jeweler who examined it. Unstewed it would have been worth \$6,000, he said.

Not Much Gratitude
Santa Claus gets thousands of letters of request before Christmas but very few letters of thanks afterwards. It is suspected that the Al-mighty also gets more petitions than praise—that the requests of those who are in trouble and want something exceed in number and in sincerity the expressions of gratitude voiced by those to whom something has been given says the Toronto Star.

Two standard 150-watt electric lamps in the top and bottom new stove give heat enough to cook an entire meal in three hours, insulated walls retaining the heat.

W. N. U., 1926.

Commandeered Warship

Woman Braved Atlantic To Get Help For Patient

The story of a woman who commandeered a warship which had Ramay MacDonald on board was told by Sir Wilfred Grenfell, the "nurse of Labrador."

Sir Wilfred, with Lady Grenfell, has just returned to England for the purpose of raising an endowment fund of \$10,000 to continue their life work of succoring the coastal inhabitants of Newfoundland and Labrador.

For more than forty years Sir Wilfred has worked for the welfare of these deep-sea fishers.

"And now I am just seventy and getting to the end of my long run," he explained.

"I want the work to go on and the first thing we have arranged is a royal matinee for December 13 at the New Victoria Cinema."

Sir Wilfred for many years has maintained five hospitals, seven nursing stations and four orphanages along a sea front of 1,200 miles.

The annual budget for their maintenance is \$40,000.

"Along the most amazing coast line in the world I have six doctors and these helpers are in charge of a population which to-day numbers 50,000," said Sir Wilfred.

"We have received great encouragement from the recent visit of Mr. Ramay MacDonald."

"Mr. Ramay MacDonald had a curious experience one night. Aboard his British cruiser he was hailed by a woman who had gone out into the Atlantic in an open motor-boat. She came from the Spotted Islands, off North Labrador."

"There she had found a bad case of appendicitis. So this brave woman—Miss Mary Cornelius—commandeered the Prime Minister's warship, steamed off to her patient, got him aboard and escorted him to the nearest hospital, where he was successfully operated upon."

Great Waterfall Named

British Guiana Falls Called Marina After Duchess Of Kent

A great waterfall tumbling 500 feet into a rocky gorge deep in British Guiana's hinterland has been named after the new Duchess of Kent.

Marina Falls, it was called by the Canadian and American exploration party which discovered the falls, is situated in the canyon through which the Potaric river rushes at express train speed toward Kaieteur Falls—the highest in the world—just 12 miles downstream.

The falls, one of the world's biggest, was found November 29—by Princess Marina of Greece becoming the bride of the Duke of Kent in London. And it was fitting that it should take the new duchess's name, for the explorers reported it resembled nothing so much as a huge bridal veil.

The party was searching for gold-bearing territory when the waterfall was discovered. E. Horne of Montreal, representing a Canadian mining company, was in charge of the party and with him were Leonard Schlemm and J. R. Lightfoot of Montreal, and W. Bracewell, chief of British Guiana geological survey.

Worshipped Sun God

Stone Used In Ceremonies Found In Isle Of Man

Linked with the civilization centered in Egypt and the Mediterranean 4,000 years ago relics of ancient sun-god worshippers have been discovered in the Isle of Man. Here Professor H. J. Fleure, of Manchester University, has excavated a great stone monument which has no equal west of Malta. Beside it have been found fragments of pottery which enable its approximate date to be fixed as about 2000 B.C. Professor Fleure has unearthed a paved court and a stonewall which leads from it to a very large stone. He has found monoliths and holes in which monoliths stood and has established the fact that there were four rows of such standing stones, two leading directly to the large stone. There is little doubt that this large stone was used to make fire with ceremonies. The giant stone was a place of burning.

New Advertising Idea
The mystery of strange voices in the house on Gacon de Gotor street in Zaragoza, Spain, was revealed as an advertisement involving a ventriloquist. Prof. Ricardo Lopez Villanueva said the ventriloquist has taken refuge in his home, fearing the noise of an aroused populace. He said the ventriloquist had been hired by a store near the house to boost business.

"And now how far is your house from the station?"

"Only a five-minute walk if you run."

Italy is pushing its good-roads program.

War On Grasshoppers

Preparing Now For 1935 Campaign Against Outbreak

Plans already are being made by the governments of the prairie provinces in co-operation with the federal department of agriculture for next year's war on grasshoppers. A very effective control campaign was carried on last summer when the grasshopper outbreak reached serious proportions.

The outbreak next year will be slightly less intense than in 1934, Dominion entomologists expect, following advice received during a recent conference. The entire situation will be more favorable although control work will again be necessary in each province.

The recently completed grasshopper egg surveys carried on in all three provinces showed that widespread outbreaks of serious infestation would be experienced again in each province in 1935. The situation in Manitoba in all probability, considering the province as a whole, will be about equal to that in 1934. On the other hand the outbreaks in prospect in Saskatchewan and Alberta are expected to be decidedly less extensive and destructive than in 1934.

Unfortunately notwithstanding the reduction in the severity of threatened outbreak, control campaigns will again be necessary upon many millions of acres if the major proportion of the crop is to be harvested. Maps based upon the surveys showing the distribution of threatened areas and the graduated intensity of probable outbreak are in course of preparation and publication. These maps will serve as the basis for the organization of the campaigns in 1935 in each province.

The grasshopper menace last summer which unquestionably threatened to be little less than a national agricultural calamity was averted and the loss reduced to but a relatively small proportion of the crops in the infested areas, officials at Ottawa declare. The outbreak in one degree of intensity or another embraced a geographic area of approximately 70,000,000 acres and required organized control activities upon 37,000,000 acres of cropped land.

The official estimates of crops saved are not yet available. However, one large grain company, after canvassing the situation through its correspondents, estimated that the crop saved by the campaign at approximately 25,383,000 bushels.

Want Canadian Turkeys
One British Buyer Considers Them Best Birds Imported

One splendid effect of the high quality of the large shipments of Canadian turkeys to the British Christmas market during the past two seasons is being shown by the outspoken anticipation of British buyers with reference to Canada's forthcoming offering this Christmas.

Formerly there was unquestioning some rivalry involved in the British Christmas market during the past two seasons is being shown by the outspoken anticipation of British buyers with reference to Canada's forthcoming offering this Christmas.

UNUSUAL PHOTOGRAPH OF YOUNG LINDY

This remarkable photo, among the first ever taken of the Lindberghs' second child, shows young John leaving kindergarten school at Englewood, N.J., with his mother, Anne Lindberg. Colonel Lindberg's son is two years and three months of age.

Signs Of Stone Age

But Archaeologists Say Ireland Not Inhabited In Ice Age

Harvard University archaeologists digging into the soil of old Ireland, have shattered a long-held scientific belief that the country was inhabited during the ice age.

There is plenty of evidence, however, that inhabitants of the emerald isle some 6,000 years ago were typical hatchet-wielders of the stone age.

In connection with stone age excavations in the north, 36 hearths, and an abundance of implements were found.

A primitive bronze axe, of roughly 1,500 B.C., and a number of flint tools were found at Carrowlisoun, in County Mayo. A bronze axe burial mound was excavated at Fowlesback, in County Clare, where the remains of four skeletons in two coffin-like boxes of limestone slabs were found.

"The strongest man in the world is to appear in London. It is said that when he wants to open a railway carriage window, he just does it."

"You spit ze Angles?"
"A few! And you?"
"No many!"

There are 20,000,000 widows in India.

To Protect Soldiers

British Tommy Calls New Device "The Mechanical Coffin"

The "Mechanical Coffin" is the amazing title which the British Tommy has given a new device for his protection when he advances against machine-gun fire.

"Armored Crawler" is, however, its unofficial title.

It is a steel structure, 7 feet long, barely 3 feet wide and less than 2 feet high. It is fitted with a 4-h.p. motor, and will move over normal ground more quickly than an infantry man can advance on all fours.

When moving forward not in face of the enemy, Tommy travels in comfort, sitting upright, but when advancing on the battlefield he lies prone, with a light machine-gun trained on the enemy gunner that he is to attack. A somewhat larger model will accommodate two men.

Invented by Lieut.-Col. Marlow, who nine years ago designed the tank, the new device illustrates the trend away from the big tank, whose usefulness was limited by its cost and by its vulnerability due to size.

It is proposed that 40 miles of tunnels and canals be built to carry water from the Mediterranean Sea in the Libyan Desert, to generate electric power for Egypt.

The SNAPSHOT GUILD

CHRISTMAS GREETINGS

They started out as ordinary snapshots but, artfully handled, turned out to be charming greeting cards. A simple, effective and individual solution of the greeting card problem.

Snapshoters have a great advantage over ordinary folks at Christmas time, for they can easily produce Christmas cards that are 100 per cent individual, unusual, and not at all expensive.

What's the purpose of a Christmas card, anyway? Simply to carry a message of cheer and goodwill from one person to another. It is, at its best, a very personal affair.

At snapshots of yourself, your home, your family, your pets, or anything else that's part of your life can be easily used in Christmas cards. The result is cards like no one else's.

There are many ways of using snapshots in greetings. The photo finishers in your town are equipped to make greetings for you, using one of your own snaps. They do some beautiful things. It will pay you, at the very least, to try one.

Or you may want to be even more individual. One of the simplest greetings consists of a card with a snapshot pasted on it and a handwritten message below. Nothing can be more personal than that.

You might use a snapshot of your family, stood up in a row, facing the camera. But is there anything

Canada Wins International Wheat Championship Twenty Times In Twenty-four Years

Testing Of Seeds

Simple Home Method Found Reliable And Removes Doubt

Take an old newspaper and cut it into sheets five inches square. Soak these sheets for a few minutes in warm water. Now place five of these sheets one on top of the other on a table or bench. Count out twenty-five or fifty kernels of the seed to be tested and place them in regular order on the last paper sheet. Cover with five more sheets of the soaked paper. Roll up the sheets into a roll and tie with string or secure with rubber bands. Place one or more of these rolls in an ordinary two-quart fruit sealer or jar. Fill sealer with warm water and let soak for four or five hours. Then pour out water and put on the screw top without the rubber ring, screw down loosely. Keep the sealer in a warm place for four or five days. Then take out the paper dolls and read the test.

One advantage of this method is its simplicity, since the sealer can be wrapped up at night and kept warm in case the dwelling house has a lower temperature at night than in the day time, as for instance when wood is used for fuel. The test is easily and quickly read and the sealer is easily and conveniently handled and occupies little space. Having used and tested practically all the methods recommended for testing seeds this has been found the simplest and most satisfactory.

Test your seeds, count guess. You can lose enough sowing one field with seed that will not germinate to pay for the time spent testing in ten years.

Would Be Great Advantage
If Rockets Could Carry Necessary Supplies To Isolated Areas

Two scientists, who are planning a balloon flight into the upper reaches of the earth's atmosphere, first penetrated by Professor Picard three years ago, intend to fire a rocket to the moon when they attain a height of twelve miles. They believe that, released at that altitude, the speed of the rocket, which will be helped along by a series of explosions, should be enormously increased, and they expect it to reach the moon in a few hours. Perhaps a more practical use for rockets is indicated by other experiments which have taken place recently among the Scottish islands.

"And if I hadn't won this year, I'd have kept right on trying," said the youthful winner. "It would have been good experience for next year."

Allopp's victory gave Canada its 20th win in the 24 times the title has been awarded at Chicago.

Allopp's win brought Alberta's string of victories in the wheat sweepstakes to eight compared with 11 for Saskatchewan and only one for Manitoba. Not since 1928 has the United States been able to produce a champion in the wheat contest.

The 1933 title was won by Frank Isaacson, of Elroy, in northern Saskatchewan.

Seager Wheeler, who is experimenting for fruit growing at his farm at Rothstein, Sask., won the Chicago wheat crown five times—in 1911, 1914, 1915, 1916 and 1918. Treble's four wins were in 1920, 1930, 1931 and 1932.

J. C. Mitchell, of Dabinda, Sask., won the title in 1910, 1920 and 1924. Other Canadian winners were: Henry Holmes, Alberta; 1913, 1914, Gerlach, Saskatchewan; 1917, Samuel Lacombe, Manitoba; 1922, R. O. Wilcox, Saskatchewan; 1923, H. G. L. Strange, Alberta; 1929, Joseph H. B. Smith, Alberta.

The four United States victors were scored by G. W. Craft in 1911, L. P. Yates in 1925, and C. Edson Smith in 1927 and 1928.

Relief Supplies From East
Maritimes Send 96 Cars Of Supplies To Dry Areas Of Saskatchewan

Maritimers opened up their hearts for drought-ridden districts of Saskatchewan to the extent of 96 cars of food and material.

These 96 cars have arrived from various points in the Maritimes since October 15. W. W. Champ, chairman of the Saskatchewan volunteer relief committee, reported that Regina, Ontario has sent 160 cars. Mr. Champ reported.

Great Sums Of Butchers
How many sons of butchers have carved their names in the pages of history? E. V. Lucas, writing in the Sunday Times, London, says that correspondents have given him a long list. Among them are John Jacob Astor, John Jayward the English founder of the American colony, Kirke White, the poet, and Cardinal Wolsey. From the snail, on the other hand, he can only think of one notable—David Cox, the painter.

When the trading schooner, Emanuel, put into Southampton, Eng., it was the first vessel in 2,000 years to dock there with an all-Jewish crew of sailors.

Not New Substance
A "glutamic acid" extracted from sugar beets, now can be used in making gravy, or as meat flavoring, according to a W. H. Campen, Omaha city chemist. The acid is now being prepared from waste residue in sugar beet refineries in West Nebraska. The acid, a white substance, is not new, according to Campen. It has been used in the past for at least 200 years and by the Chinese for use with rice for centuries, he said.

For all Canada, the area estimated as sown to fall rye in 1934 is 631,000 acres, a decrease of seven per cent compared with 1933.

Trailer "Steers" With Car
Niels Jensen, farm laborer of Saskatoon district, is an inventor not for the sake of personal gain, but for convenience. He has designed and constructed an automobile trailer that "steers" with the car in any direction. Two wheels of the trailer are connected by a propeller shaft and this, in turn, is connected by a rod to the steering gear at the front of the body. The rod passes through the body of the car on the left hand side.

Wishing you a Merry Christmas and Happy New Year

Christmas came that? Not much. It would be far better, wouldn't it, to have a snap of the family gathered about the fireplace, hanging up their Christmas stockings? Or decorating the tree, or putting up a holly wreath on the front door? A view of your lighted home on a winter night would make a charming card. Your camera can do just about anything you want, providing only that you give it the right kind of co-operation. For interiors and night views outdoors use a super-sensitive film; equip yourself with a few of the inexpensive modern lamps of the photoflood and photo-flash types; don't forget that auto headlights can be used to light up small outdoor scenes sufficiently for brief time exposures. And so on.

But remember that now, of all times, your picture must "tell a story," must be clean-cut and vivid. The idea is the most important thing. With care you can get the picture you want.

Go into "executive session" with your family now. Discuss and select the best—and get out your cameras.

One word of advice, born of experience—simple ideas are best. They are easier to execute and, nine times out of ten, they "click" more effectively than something pretentious or complicated.

ALBERTAN RETURNS TO MORNING FIELD

Announcement by the Calgary Albertan of the decision to resume its former status as a morning newspaper after the interval of several months was so doubt, received with pleasure by many. Its appearance yesterday morning was welcomed as an old friend in many parts of the province. As the only morning newspaper in the province, the Albertan occupied a unique position for many years, and it was missed from many breakfast tables. A morning daily has a field of its own to serve and the return to a service so long and honorably carried out by the Albertan will be hailed by many communities in the province. The Western Globe extends best wishes for success to The Albertan management in their present venture.

LEGISLATURE OPENS FEBRUARY 7

Edmonton, Jan. 3.—The 1935 session, the fifth and final session of the seventh legislature of Alberta will open Thursday, February 7th, according to announcement made today by Premier R. G. Reid.

COUNTRY BANK BRANCHES CLOSE

Stated by bank officials to be a small fraction in comparison with the number operating through the province, six country branches of chartered banks in Alberta have been closed during the past two months. In all cases staffs have been retained in their entirety.

THE DAY'S WORK

A regular air mail and passenger service by airplane has been opened between England and Australia, 12,000 miles, the longest air route in the world. The journey either way is timed at twelve days, and the first plane reached Croydon a few minutes ahead of time. The new service is acclaimed, and rightly so, as a potentially important new link in the net-work of Empire communications.

As an achievement in air navigation the fliers on the new route have fewer difficulties to contend with, and take far fewer risks than the men who winter and summer, fly from and to Edmonton across the unpeopled wilds of the great northland, keeping the remote trading posts and still more remote mining camps at Bear Lake in touch with the outside world.

Those whom they serve alone know what these men endure. The public hear little of them. An item in the daily newspaper states briefly that one has landed at Bear Lake and another has left Fort Smith. The next occasion no surprise and accolades no alarm. It is only routine stuff, the daily record of a service that is carried on in all sorts of weather, under tremendous handicaps, and with so few mishaps that the reader hardly associates danger with the pilot's occupation.

There are no more wonderful fliers in the world than these men who wing their ways across the great lone land, where landing places are few and far between, and where the winter weather carries a menace unknown in the milder climes through which the new England-to-Australia planes operate. An Edmonton reader who knows something of the conditions and what they signify, may well turn appreciative thoughts to these voyagers of the northern skyways when he learns the mastery is 50 degrees below zero at points along their lines of flight.

ENOUGH IS ENOUGH

Trading in October wheat on the Winnipeg grain exchange is not to be permitted for a while. Explanations offered by Mr. McFarland, head of the wheat pools, and by Premier Bennett, are that the purpose is to prevent speculation in wheat which has not yet been sown.

The fact behind the news is that the selling agency has been functioning mainly as a buying agency, and is loaded up with wheat it does not know what to do with, much of it bought at prices away above the world level, with the Government standing responsible if it has to be sold at a loss. It is further Government speculation, not speculating by the public, the October ruling is intended to avoid.

The taxpayers will have no reason to protest the decision to refrain from adding a huge volume of prospective wheat to the enormous quantity of wheat that has been bought

at their risk. As the farmer does not know whether he will have any wheat to deliver next October, his interest in the ruling will be speculative rather than actual.

FOR SALE OR TRADE

1 milk cow, \$25.00; Heavy Wagon at a reduction of \$40; Grain tank, new \$35; 2 1-2 in. high wheel, \$30; Emerson Gang Plow in good condition, \$50; 1-horse 5-tooth garden cultivator, \$7.00; 7 inch Grinder; 3 inch Grain Grinder; 2 8-h.p. Bennett Opens His Campaign

Ottawa, Jan. 8.—(Rt. Hon. R. B. Bennett) struck a popular note in his remarkable speech last night, judging by the voluminous response of felicitous messages which began to arrive as soon as he had finished. They continued today.

Designated, the speech was the opening of the Conservative campaign in the election and an indication of the platform on which the prime minister will go to the country.

In successive addresses there will be a process of unfolding of the policies which are to be followed. They will include a system of social security by means of unemployment insurance, health insurance and old age pensions and one of social justice by means still to be defined.

Fundamentally, business is to be regulated by government intervention and control. Some of the remedies which are proposed may encounter constitutional obstacles, although that prospect is little stressed. If these should be found insuperable then amendments will be

sought. But meanwhile, legal officers place reliance in the sufficiency of the federal powers as now derived from the British North America act respecting trade and commerce and the criminal law.

The precise line to be followed must await the conclusion of the price spreads commission, at least as a matter of courtesy toward those conducting that unfinished inquiry. But it may be taken for granted that the majority report, if there is not unanimity, will not be such as to arouse much hostility in government quarters or conflict with what the prime minister has so definitely in view.

Various proposals are being considered. As recently indicated the same principle as is embodied in part two of the Marketing Act may be followed and penalties provided for those guilty of unfair and unethical practices in business or who pay wages below those consistent with a living standard.

The companies law, pretty tight as it is, can further be tightened. Business profits can be regulated by means of taxation and those who make money can be compelled to disclose where and how it was made. The present system could be much

more stringent. A body with inquisitorial and supervisory powers is likely to be the means of the proposed regulation. The authority, however, is unlikely to be arbitrary or to usurp the functions of Parliament which would be asked to create it.

Such a board, it is held, could be set up in a way to avoid those constitutional weaknesses which caused the board of commerce to be wrecked after the war.

The regulatory measures which are in view, it is thought, enlist the support of Hon. H. H. Stevens and of that body of disaffected Conservatives who viewed with misgiving the breach in the cabinet caused by the former minister's resignation.

"Bennett the Reformer," as head of a crusade for social justice may be a slogan in the forthcoming election campaign. His speech last night and those to come—the subject of studied preparation and consultation here for many weeks—have clearly in view vital changes in the social order when under present conditions, the old formula fails to function.

Whether all of the Conservative party will be enthusiastic for the new program the first caucus will disclose, but the purpose in view is unlikely to be arrested. It is Mr. Bennett's plan.

Many political observers find in this new creed support for the idea they have always held that the general election is likely to be expedited and come perhaps in the early spring.

TWO SUFFOCATED BY GAS FUMES

Calgary, Alta., Jan. 8.—Overcome by fumes from a furnace, two men were dead today and two women were in the General hospital in a critical condition from carbon monoxide poisoning in a house at 920 Twentieth avenue east.

Thomas Harry Wheatley, about 45 years of age, 920 Twentieth avenue east. He was a past president of the Imperial Veteran's Club, Calgary.

Thomas Hall, 31 years of age, a member of the district ordinance corps, 231 Fourteenth avenue east.

The Injured Mrs. Wheatley, wife of deceased, in the General hospital in a critical condition from carbon monoxide poisoning.

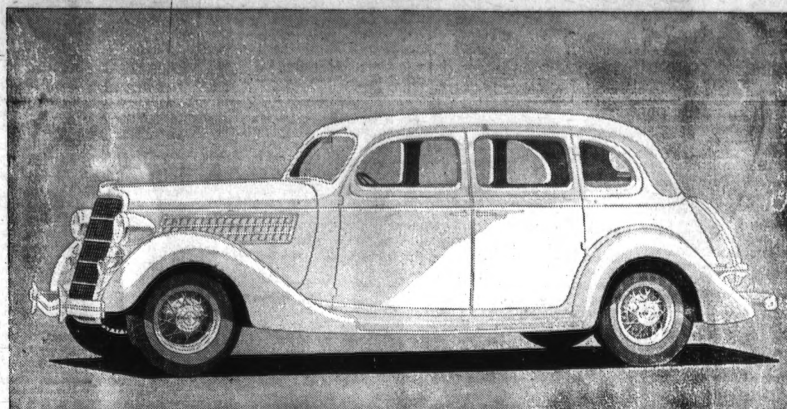

Miss Mary Kennedy, 925 Eleventh avenue west, suffering from monoxide poisoning.

Both women were unconscious when taken to the hospital. Their condition is critical.

DEATH OF MRS. E. FAWCETT

Mrs. Elizabeth Fawcett, one of Lacombe's first residents, died at her home here on Wednesday last, in her 86th year. The funeral will be held on Friday afternoon, service to be conducted by Rev. R. B. Layton, in St. Andrew's United Church. The sympathy of the many friends of the bereaved family is extended to them in their sorrow.

FORD V-8 FOR 1935

The New Ford V-8 for 1935 is the biggest and roomiest Ford car ever built. It is a strikingly handsome car, with modern lines and new, luxurious appointments.

But most important of all it is especially designed to give you smooth, easy riding over all kinds of roads—"a front-seat ride for back-seat riders."

This ease of riding is achieved by the use of three basic principles never before combined in a low-price car.

1. Correct distribution of car weight by moving engine and body forward eight and a half inches.

2. New location of seats by which the rear seat is moved forward, toward the centre of the car away from the rear axle and away from the bumps.

3. New spring suspension which permits the use of longer, more flexible springs and increases the springbase to 123 inches.

A New Ford V-8 That Brings New Beauty, New Safety, and a New Kind of Riding Comfort Within Reach of Millions of People

dependability and economy in the service of over a million owners. There are refinements, but no change in basic design. You buy premium performance when you buy this Ford V-8—full 90 horsepower and 85 miles an hour.

We invite you to see this New Ford V-8 at the showrooms of Ford dealers. You will want to ride in it—to drive it yourself. You will find it a new experience in motoring.

Ford V-8 Prices Are Low

11 BODY TYPES—Coupé (5 windows), \$645; Tudor Sedan, \$665; Fordor Sedan, \$750; DE LUXE—Roadster (with rumble seat), \$715; Coupé (3 windows), \$720; Phaeton, \$725; Tudor Sedan, \$730; Cabriolet (with rumble seat), \$815; Fordor Sedan, \$810. TOURING SEDANS, with built-in trunk—Tudor Touring Sedan, \$750; Fordor Touring Sedan, \$830.

(F.O.B. East Windsor, Ontario. Bumpers, spare tires and taxes extra. Small down payment. Convenient terms.)

BE SURE TO SEE THE NEW FORD V-8 1½ AND 2-TON HEAVY DUTY TRUCKS...AND THE NEW COMMERCIAL CARS

Motor Vehicle Licenses

Announcing reduction in fees effective January 1, 1935. Reduced fees for lower priced passenger cars will be charged as follows:

Not exceeding 100 inch Wheelbase	\$10.00

QUALITE EXTRA SUPERIEUR

WORLD HAPPENINGS BRIEFLY TOLD

Henry Wise Wood, veteran chairman of the Alberta wheat pool, was re-elected to office at the annual meeting at Calgary. C. Jensen of McGrath, was named vice-president.

Vicount Buckmaster, chairman of the governing body of the Imperial College of Science and Technology and a former lord chancellor, died recently in London.

A special period of training of French reserve soldiers as part of a plan to build up the nation's defenses, especially along the Rhine frontier, was announced recently.

Government regulations on the sale of liquor in Newfoundland have been radically changed, according to an official communiqué. Amount of purchases, hitherto set at two bottles of spirits a week, is now unrestricted.

A rubber exhibition opened at the Science Museum, South Kensington, and running six months, will include two rubber seeds brought from the Amazon by Sir Henry Wickham in 1874.

Bird fanciers who attended the All-England show at Norwich, England, talked of purple and red canaries as being possibly shown at next year's exhibition, feeding having been discovered as the secret of color.

The appointment of F. G. T. Lucas, K.C., of Vancouver, to be a judge of the supreme court of British Columbia has been approved by the governor-general. He succeeds Mr. Justice Macdonald, resigned.

A course in marriage to instruct men students how to avoid unhappy unions is being considered by the University of Washington, Dr. Norman S. Hayner, associate professor of sociology, disclosed. The course would be open to seniors only.

An adverse trade balance of nearly \$100,000,000 for the year ended October 31 was revealed in Irish Free State trade statistics. As in recent years much of the adverse balance is attributed to the dispute with the United Kingdom since the advent of the Republican government to power.

Should Take Precautions

From Kansas Comes A Warning About "The Twin Perils" To Farm Children

In a letter just received from Independence, Kansas, Mr. A. Z. Potter says that having been raised on a farm he has first hand knowledge of the sad deaths of a good many children caused by the carelessness of their elders. Every parent should take heed to this warning—offered in a friendly spirit by our correspondent from Kansas. Here it is:

"The twin perils for children living on farms and in small villages are open wells and cisterns and loose boards left with nail points sticking out of them.

"Cover all wells and cisterns securely and draw all nails from loose boards because a child stepping on them, whether clean or rusted, is in deadly danger from the germs of Tetanus (lockjaw) with which much ground is infected."

Learning To Fly "Blind"
Brig-General A. C. Lewin, who is sixty and learned to pilot an airplane only three years ago, has already flown three times from England to Kenya, and made a successful forced landing. Now he has bought a new airplane and has gone to Humber, Southhampton, to take a course in "blind" flying—by instruments only.

Gassed High In Air
Fetched 700 feet above the earth, two women died of asphyxiation on the Eiffel Tower in Paris recently. They had lit a charcoal brazier to keep themselves warm in the little lamproom between the second and the third floor and the fumes killed them, according to the tower's verdict.

Longest Fence In World
The world's longest fence—40 kilometers, or about 250 miles—is to be erected along the Norwegian-Finnish border to prevent the nomadic Lap's stray stocks of reindeer wandering uncontrolled from one country to the other.

Japan Plans Airline Link

Mandated Islands Are To Be Joined With Mainland

Japan is preparing to open southward thousands of miles of airlines to fasten her Pacific Island possessions and mandates more firmly to the homeland.

Two naval aviators who sailed recently from Yokohama are now surveying the route between Saipan and Palau, using a seaplane of 1,200 miles cruising radius. Their arrival was prepared for by establishment of meteorological observatories and wireless stations at Saipan, Palau and Truk.

The Japanese hope to link this into island service water with Japan proper in an air-service from Tokyo to Saipan by way of the Bonin Islands. An appropriation to subsidize this new route was contained in the Government's 1935-36 budget just completed.

The Tokyo-Bonin Islands line will be the first link of a projected airline to join the imperial capital with its farthest flung mandates, one-third of the way across the Pacific, lying directly athwart the projected American air routes from California to the Philippines and China.

A JACKET DRESS THAT'S SMART—WEAR IT 'NEATH YOUR WINTER COAT

Today's smart costume is in handsome in checked woolen in Sandringham blue. The upper part of the dress is brown, cotton crepe. The brown tone is repeated in the bone buttons. You'll love its practicality besides its extreme smartness. It's as simple as can be to make it and the coat is surprisingly small.

Black rough woolen is another very smart scheme with the dress bodice of black metal threaded crepe or of black velvet.

Style No. 520 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 36 requires 4½ yards of 39-inch material with 3½ yards of 39-inch contrasting.

Price of pattern 20 cents in stamps or cash (cash is preferred). Wrap coin carefully.

Originated In Canada

Red Cross Outpost Plan Copied Throughout The World

The outpost hospital service originated by the Canadian Red Cross Society and spread by it in North America, was the most important subject, beside emergency disaster relief, discussed by the peace time work section of the International Red Cross Conference at Tokyo, Mrs. H. P. Plumptre, vice-president of the Canadian Society, said when she presented a review of the Tokyo conference to the annual meeting of the Ontario division at the York Hotel, Toronto. Mrs. Plumptre had just returned from the Tokyo conference which she attended as the official representative of the Canadian society.

In the discussions of the conference it was divulged that the Canadian society has given leadership in outpost service to the entire Red Cross organization and it is being adopted all over the world. Mrs. Plumptre said. It was started by the Canadian society as an experiment but has now become an integral part of Red Cross services throughout the world as visiting housekeepers, nurse training and so forth.

Wonderful New Camera

Film Registers In Detail Action of Human Heart

A camera which records pulsations of the human heart was demonstrated in Philadelphia at a conference of homeopathic medical delegates. A patient in a hospital here, G. Howlett Davis, Jr., of Detroit, inventor of the camera, made photographs and explained workings of the machine.

"This little box," Davis said, "contains a sensitive button, which presses with the heart when pressed against the chest. The vibrations are conveyed to a small laminated bar of rochelle salts, which generates an electrochemical current commensurate with the heart action.

The apparatus, which is equipped with double parts, can register simultaneously on the same film the behavior of two valves of the heart," Davis continued.

"The current is amplified and sent through a galvanometer, the needle of which fluctuates with the current. The film, moving at the rate of two feet a second, registers in detail the action of the heart," he told the meeting.

Brain "Light" Shown

New Evidence Cells Of Body Give Off Radiant Energy

Light that is locked up inside the brain was made to shine visibly in a dark room at the Cleveland clinic, giving new evidence that the cells of the body give off radiant energy.

The brain "light" was shown as part of a demonstration prepared for members of the National Academy of Sciences by Dr. George Crile, head of the clinic. It was generated in a solution of proteins taken from a calf brain when oxygen was added to the solution, and glowed for a few seconds like a weak electric light bulb. Such light, or radiant energy, is given off by all body cells after being absorbed from sunlight, Dr. Crile believes. The sun, he holds, thus "shines" again in the protoplasm of the body.

When various kinds of materials, such as alcohol, poisons, drugs, etc., are put in the brain solution they affect the amount of light that the brain material gives off. Most poisons cut down the amount of light, while some other substances increase it.

According To Science

Sir Josiah Stamp Believes Youth Is On Wane

Sir Josiah Stamp, who knows his economics, says that in 30 years or so, this will be a greatly changed world in at least one respect. In 1904, if the present population trends keep on, there will be only half the number of children under 15 that there are now.

Which means that this planet will be a more elderly sort of place. If Sir Josiah is correct, the middle-aged and aged will occupy the centre of the stage in years to come, and youth, being in the minority, will be relegated to the background. It is hard to believe that youth is on the wane, but science seems to have the facts in black and white.

So let us make the best of youth while there is still plenty of it around. Let us greedily absorb all its noise and shouting and laughter. For 30 years from now there won't be half as much. We may have to search around to find any young people at all. Science says so and science knows—Detroit Starlight Night.

Why People Stay Home

It is the contention of Irving Caesar, songwriter, that the radio retards prosperity; the folks stay at home evenings instead of going out and spending money. Still, we have to consider the people who cannot get out of the front door on account of the world, says the New Yorker.

The reason why ladies nowadays wear hats of curious shapes, is because if they weren't of curious shape they would look queer.

SIR HERBERT S. HOLT
Who has resigned as President of the Royal Bank of Canada and becomes chairman of the executive committee.

Retires From Presidency Of The Royal Bank

Sir Herbert S. Holt Is Succeeded By Morris W. Wilson As President And Managing Director

After 26 years in office, Sir Herbert S. Holt has relinquished the presidency of The Royal Bank of Canada and now becomes Chairman of the Board and Chairman of the Executive Committee. He is succeeded by Morris W. Wilson as President and Managing Director, and Sydney G. Dobson follows Mr. Wilson as General Manager.

These changes were announced at the end of the bank's fiscal year, following a regular meeting of the board. They are changes of great importance, not only an important milestone in the 65 years of Royal Bank history, but also an event of national significance. Sir Herbert Holt's retirement from the presidency marks the withdrawal from active duty of an outstanding Canadian, under whose leadership the Royal Bank has developed from a relatively small organization to its present status as one of the great financial institutions of the world. Furthermore, the appointment of Morris W. Wilson as President marks the first occasion this office has been attained by a man from within the ranks of the bank.

In assuming the newly created position of Chairman of the Board, Sir Herbert Holt will continue a connection with the Royal Bank which began nearly thirty years ago with his election as a director in February, 1905. He was appointed vice-president of the bank two years later, and became its president on November 16, 1908.

Little Journeys In Science

LIQUID AIR

(By Gordon H. Guest, M.A.)

All gases, if cooled and compressed sufficiently, may be changed into liquids, or even into solids. Sulphur dioxide (the gas which is produced when sulphur burns in air) is easily converted into a liquid, but other gases, including hydrogen and oxygen, are very difficult to liquefy. The liquefaction of helium by the Dutch scientist Kamerlingh Onnes, in 1908, was regarded as a great scientific achievement.

Liquid air was first obtained about fifty years ago and since then it has been used commercially, the method of producing it having been continually improved. It is made in large quantities by an intricate machine in which the air is compressed and cooled. The point at which the air becomes liquid is called the "critical temperature." Liquid air boils at -190 degrees centigrade. When such objects as a rubber ball, an egg, a piece of meat or a flower are placed in the liquid they become nearly as cold as the liquid itself. A block of ice is too big, however, for the ice is too hot as compared to the liquid air.

Liquid air is used chiefly in the production of nitrogen and oxygen, and is also used as a cooling agent. When mixed with charcoal it forms a powerful blasting explosive which is used in the mining industry. It was first thought that liquid air would be used widely for refrigeration, for cooling and ventilating rooms, and for the destruction of bacteria, but because it is expensive to produce and difficult to handle, it has not been used extensively for these purposes.

Changed Ancient Custom

Queen Victoria's Husband Insisted On New Ring For Wedding

Queen Victoria's husband is responsible for the fact that Princess Marina had a wedding ring made specially for her.

Until the Prince Consort married Queen Victoria, it was the custom for rings which were family heirlooms to be used for royal marriages. At Windsor Castle there is a ring that was used for no fewer than seven royal marriages. Known as the Aragon Ring, it was brought from Spain by Catherine of Aragon and was first used when she was married by proxy to the infant Prince Arthur of England. It was subsequently used when she married Henry VIII, and by all five of the other wives of that merry monarch!

A very ancient ring was used when Queen Caroline married George IV. It had all manner of associations and many predicted evil results from its use. Even the queen herself threw it into the roadway at Westminster. When the Prince Consort married Queen Victoria, he insisted on using a new ring, and that has been the custom ever since.

Insects destroy almost one-tenth of the world's crops.

Aim Of French Aviator

Linking New York To Paris In Fifteen Hours

Louis Bleriot, who twenty-five years ago was the first to fly across the English Channel, told at Paris of his dream of the aviation of the future when Paris and New York will be linked by air in fifteen hours.

The air pioneer was guest of honor at a luncheon meeting of the American Club of Paris, where his great exploit was feted.

"My dream," he said, "would be to throw an aerial bridge between Paris and New York such as I did twenty-five years ago between England and France. Concerning the realization of this dream, it is one of your countrymen, it seems to me, who has best studied that question. From the look of things it should not take more than fifteen or eighteen hours to link the two capitals.

"The floating islands as established by one of your firms would be 500 meters long, 100 meters wide and 60 meters high. Their security is as great as insurance companies have already consented to give reduced rates. From the financial standpoint passenger traffic can be expected to yield 80 million francs and air mails another 80 millions, 160 millions in all (\$8,000,000)."

Understands Wild Animals

Trainer Succeeds In Raising Leopard Cubs In Zoo

Hans Brick, animal trainer at the Burnt Stub Zoo at Chessington, Surrey, is the only man who has successfully raised leopard cubs in Britain.

Usually a leopard will eat its young if they have been touched, or even seen by a human being.

But Hans Brick, who has such power over animals that Babette, a leopard at the zoo who two months ago gave birth to two cubs, allows him to enter her cage and play with them. She will even put them in his lap.

The London Zoological Society has congratulated him on his success.

He has spent 15 years in the jungles of the world, mostly by himself, studying the habits of lions, tigers, leopards, panthers and panthers.

Never during that time did he find it necessary to shoot. His experience and understanding were such that he was even able to "talk" to the animals—without uttering a single word. The point at which the air becomes liquid is called the "critical temperature." Liquid air boils at -190 degrees centigrade. When such objects as a rubber ball, an egg, a piece of meat or a flower are placed in the liquid they become nearly as cold as the liquid itself. A block of ice is too big, however, for the ice is too hot as compared to the liquid air.

Recipes For This Week

(By Betty Barclay)

ALL-BRAN DATE BARS

3 eggs
2 cup nuts (chopped)
1½ cup brown sugar
½ cup dates (cut fine)
½ cup flour
½ teaspoon baking powder
½ cup bran

Beat the egg until light, add the sugar and beat well. Add the flour sifted with the baking powder. Add nuts, nuts and dates, and spread the mixture in a layer one-half inch thick in a greased shallow pan. Bake in a moderate oven (375 degrees F.) for about 20-30 minutes. Remove from the oven and while warm, cut into squares or bars. Roll the pieces in powdered sugar and serve as a pudding with whipped cream. Yield: 24 bars—1½ inches.

NOVELTY CUSTARD

2 eggs, slightly beaten
¼ cup sugar
½ teaspoon salt
2 cups milk, scalded
½ teaspoon vanilla
5 tablespoons Grape-Nuts

Combine eggs, sugar, and salt. Add milk and beat thoroughly. Add vanilla. Put 1 tablespoon Grape-Nuts in each custard cup; fill with custard mixture. Place cups in pan of hot water. Bake in slow oven (325 degrees F.) 40 to 45 minutes, or until knife inserted comes out clean. Serves 5.

Building Programs

United States Government To Expend Large Amount On Housing

Hinting positively at the vast size to which the United States government may expand its slum clearance and low cost housing, Secretary of Interior Harold Ickes said the public works administration's present \$150,000,000 program "will barely scratch the surface." "We know that in the end a much more liberal contribution will be, or at least ought to be made for this desirable social purpose," Ickes said. He expressed a hope for a greatly enlarged program in 1935.

Cause Of Baldness

Baldness is blamed on eye fatigue by Dr. George Carlson of Lincoln, Nebraska. He told ophthalmists of Southeastern Nebraska that also persons that of late, although thin hair, baldness have some kind of eye fatigue. "Nerves and muscles of the head," he said, "are deprived by eye strain of energy that should go to the roots of the hair."

One inch of rain on an acre of land would fill more than 600 barrels of 45 gallons capacity each.

End Of Great Navy

Last Of Big German Battleships Being Broken Up

While the naval discussions in London are seemingly futile in regard to limitation, the end of what was once the second most powerful navy afloat is being accomplished. Several of the former British naval dockyard known as Rosyth, just beyond the Forth bridge. There the wartime German navy is being dissected and broken up under the melting qualities of acetylene torches and the hammer blows of hydraulic tools.

When the Germans by pre-arranged signal scuttled their surrendered fleet at Scapa Flow they thought that was the end of their navy. Probably they thought the job of raising an entire navy was too big to be attempted. They were wrong. Several hundred thousand tons of steel, iron, brass and bronze are being cut out of them until there is nothing left resembling a ship. The common grades of steel are sold to industries that make rails, which are being shipped all over the world. Much of the better grade is being bought by automobile manufacturers. The highest grade of all, that which was armored turrets, goes to toolmakers, shipbuilders and engine makers. Some of it, in fact, has been resold to Germany, where it may even reappear in the recreated pocket battleships. Brass goes to clockmakers, instrument makers and various other industries. The bronze from the heavy propellers and gun fittings is sold to other propeller makers, bell makers and other users of bronze.

Thus the end of a great navy—St. Thomas Times-Journal.

Mandate Against Queues

Chinese Police Given Authority To Enforce Order

The recent order issued by Nanking that the wearing of queues and the custom of binding the feet of children must be discontinued immediately has been literally taken to heart by the authorities of Tahan, in Shantung province, according to letters received in Shanghai from missionary stations in the region. All police officers, especially those stationed at the gates of the city have been armed with shovels and orders have been issued to the effect that if the mandate against the wearing of queues is not voluntarily obeyed, the police are to enforce it. In several cases, the police have not given the offender a chance to dispose of his queue himself, but have snipped off the offending braid with practically no ceremony whatsoever.

Blue Uniforms Discarded

Soldiers Of France Will Wear Dust-Colored Outfit

The world's armies are getting back to earth. A recent French order that artillery men discard their colorful sky-blue uniforms brought the last major military power into the ranks of those whose soldiers wear drab uniforms, a National Geographic Society bulletin said. The new French uniforms will be dust-colored.

Soldiers of the United States wear olive drab outfits. British, Belgian, Polish and Japanese warriors have khaki uniforms. Germany and Spain supply gray clothing. Switzerland, Italy and the Netherlands have gray-green. Reason for the trend away from the brilliant colored uniforms of 100 years ago has been to avoid detection of troop movement by snipers and aeroplanes. Spain and Japan still retain elaborate and vari-colored full dress uniforms but these never see the mud of front line trenches.

For The First 45 Weeks Of 1934

ended November 8, shipments of livestock from Western to Eastern Canada, compared with 1933 (figures within brackets), included 102,618 (78,702) cattle; 6,716 (3,519) calves; 66,831 (48,831) sheep; and 186,574 (249,601) hogs.

Films of the assassination of King Alexander were barred from the Netherlands.

Belgium is reforming its banking structure.
